WORK EXPERIENCE

Walmart International

May 2026 – Present

Lead Software Engineer

Architected high-performance, full-stack global commerce interfaces and distributed backend services with Rust and Node.js for Walmart International, driving critical digital shopping experiences for hundreds of millions of peak monthly users in dozens of languages.

SureSteps

May 2025 – May 2026

Head of AI Engineering

Solely architected an enterprise multimodal GenAI platform, engineering custom RAG, high-throughput document extraction, and hybrid retrieval pipelines to power end-to-end intelligent knowledge synthesis.

- **Key Result:** Architected the full product end-to-end: responsive web app, cross-platform mobile app, and scalable backend services.
- Designed an AI-powered data pipeline for intelligent content analysis, classification, and enrichment.
- Integrated Salesforce CRM for seamless customer data sync and automated workflows.

Nike

Jan. 2025 – Dec. 2025

Lead Engineer

Led full-stack architecture for Nike's enterprise athlete dashboards and core services, serving as the foundational upstream data source powering all downstream systems company-wide.

- **Key Result:** Decreased release cycles by 30% through advanced CI/CD automation.
- Architected real-time inventory services handling millions of requests.
- Delivered distributed event-driven workflows using NATS and Node.js.

Mars (mms.com)

Jul. 2023 – Jan. 2025

Lead Engineer

Led full-stack architecture and delivery for M&M'S global e-commerce platform, scaling custom DTC ordering flows to flawlessly support 3M+ peak monthly users.

- **Key Result:** Built services reducing packaging processing time by 85%.
- Improved uptime to 99.9% across digital storefronts.
- Architected delivery ETA engine with sub-40ms response.

Apple (SPG)

Jul. 2022 – Jul. 2023

Senior Engineer

Engineered distributed telemetry services and real-time analytics dashboards processing billions of events to power mission-critical observability at massive scale.

- **Key Result:** Reduced render time by 40% via virtualized components.
- Built shared UI kit used by 200+ apps.
- Boosted simulation platform UX through async optimization.

Nike

Jul. 2021 – Jul. 2022

Senior Engineer

Architected high-velocity warehouse automations that processed over 44 million records yearly and reclaimed 36,000+ hours of team bandwidth with Node.js and TypeScript.

- **Key Result:** Built a warehouse management service that cut stock shortages by 25%.
- Scaled microservices to handle 20% more warehouse transactions.
- Tuned MySQL queries and indexes, boosting database performance by 30%.

Drive Social Media

Dec. 2018 – Jul. 2021

Software Engineer

Transformed the company's tech landscape by rebuilding its entire product suite on React, NestJS, and AWS, architecting unified multi-provider analytics, automated content generation, and cross-platform scheduling to drive massive franchise growth.

- **Key Result:** Improved platform performance by 800% and increased user retention by 240%.
- Delivered features that helped acquire 1,000 new clients (~\$25M ARR).
- Built CI/CD pipelines on Jenkins and GitLab to accelerate releases.

Impending Success LLC

Jul. 2015 – Nov. 2019

Software Engineer

Delivered custom full-stack solutions and modular CMS architectures across client projects using React, TypeScript, Vue, Node/NestJS, and Laravel to streamline content management and messaging systems.

- Designed and shipped tailored solutions in Angular, React, Node.js, and Laravel.
- Maintained 99.9% uptime across client production systems.
- Delivered e-commerce platforms that boosted client sales by 40%.

Edgar County Humane Association

Jan. 2014 – Jan. 2016

Full Stack Developer

Digitized the shelter's legacy paper operations from scratch by building an AngularJS web app, custom admin dashboard, and multi-source animal adoption API.

- Built a custom adoption portal driving a 72% increase in engagement and 55% more adoptions.
- Mobile-optimized UI grew registrations by 65% and volunteer sign-ups by 58%.
- Developed secure APIs and payment integration, cutting form errors by 45%.

EDUCATION

University of Maine, Presque Isle

May 2026

BA in Business Administration, Project Management

Honors: Dean's List

SKILLS & INTERESTS

Technologies: React, Next.js, TypeScript, Tailwind CSS, Node.js, NestJS, Rust, Python, Go, PostgreSQL, Redis, Elasticsearch, DynamoDB, AWS, Docker, Kubernetes, Terraform

AI & Automation: Generative AI, LLMs, RAG, AI Agents, Vector Databases, LangChain

Skills: Technical leadership, Mentoring, Stakeholder communication, Cross-team collaboration, Software Architecture, System Design
